

ESG EGYPT

UNDERWATER TECHNICAL DIVISION.

PAST EXPERIENCES & RECORDS

1. Through 2014:

1. Underwater Complete Survey for North & South Breasting dolphins & Loading terminal of SUEZ OIL PROCESSING Company (SOPC) under supervision & attendance of MESSERS Bureau VERITAS (BV) as classification society on December 2014. (This project included many underwater activities; Ultrasonic thickness Measurements , Cathodic Potential Measurements , Magnetic Particles Inspection For welds, splash zone coating inspection, underwater visual & video inspection using (CCTV) for the whole structures , Professional Technical Reporting with BV Class certification.
2. IN-water video/photography survey with technical reporting for M/V Western Texas through its laying a float at DAMEITTA Harbor on November 2014 , due to the request of MESSERS / FML Ship Management Ltd , these activities had executed under supervision , attendance of & with Certification of MESSERS / GERMANSCHEIDER Lloyds (DNV/GL).
3. Underwater cleaning, splash zone coating application, underwater video inspection & underwater still photographing for El HAMRA Jetty Piles & caisson of West Petroleum Company (WEPCO) due to the request of Egyptian Maintenance Company “EMC” as main contractor on November 2014 .
4. Underwater cleaning & installation of boat landing fenders with video/photography for offshore Platforms of Abu Kir Petroleum Company (APC) due to the request of Egyptian Maintenance Company “EMC” as main contractor on October 2014.
5. IN-water video/photography survey with technical reporting for M/V Coral Jasper through its laying a float at El DEIKHILA HARBOUR on June 2014, due to the request of MESSERS / New Trans Shipping Ltd.
6. Marine, survey & diving activities for provision & installing cathodic protection system repairs/protection works for water intake on suction sealines of firefighting station at South Bakr power plant of General Petroleum Company (GPC) due to the request of Egyptian Maintenance Company “EMC” as main contractor on April/May 2014.
7. Complete Survey for LL87 Platform under supervision & attendance of MESSERS Bureau VERITAS (BV) as classification society due to the request of Egyptian Maintenance Company “EMC” as main contractor on February/March 2014. This project included many underwater activities ; U/W Shear wave inspection for U/W Welds , Ultrasonic thickness Measurements , Cathodic Potential Measurements , Magnetic Particles Inspection For welds , splash zone coating inspection , underwater visual & video inspection Using (CCTV) for the whole structures , Professional Technical Reporting with BV Class certification).

2. Through 2013:

8. Inspection activities for above & underwater areas & application of INCOTEST Technique for NON Contact thickness Measurements of 18 Risers / 11 Platform & providing the professional technical reporting of PETROBEL Company due to the request of (Egyptian Maintenance Company “EMC”) as main contractor through November 2013.
9. Underwater activities & providing the professional technical reporting of the following operations to Petro Gulf Misr Company due to the request of PETROMAINT as main contractor through 2013 :
 - NDT Inspection of the annual survey for WP-C Platform (LR Certification)
 - NDT Inspection of the annual survey for WP-D Platform (LR Certification)
10. Underwater video/photography survey & technical reporting for ZAFARANNA GEMSA FPSO Tanker through its laying a float at ZAFARANNA – Red Sea on February 2013 , due to the request of MESSERS / THOME Co Ltd (Singapore), these activities had executed under supervision , attendance of & with Certification of MESSERS / DET NORSKIE VERITAS (DNV).

3. Through 2012:

11. Underwater activities & providing the professional technical reporting of the following operations to Petro Gulf Misr Company due to the request of PETROMAINT as main contractor through 2012 :
 - NDT Inspection of the annual survey for GEISUM Star (IMO#8750326) (ABS Certification).
 - NDT Inspection of the annual survey for WP-B Platform(IMO#9104572) (ABS Certification)
 - NDT Inspection of the annual survey for WP-C Platform (LR Certification)
 - NDT Inspection of the annual survey for WP-D Platform (LR Certification)
 - Debris Removal & Sea bed survey for the rig approaching area of WP.B Platform
 - Debris Removal & Sea bed survey for the rig approaching area of G-16 Well of Tawilla Platform.
12. All marine, survey & diving activities for provision & installing cathodic protection system repairs/protection works for water intake on suction sealines of firefighting station at South Bakr power plant of General Petroleum Company (GPC) due to the request of PETROMAINT as main contractor on (September / October) 2012.
13. Blinding Sewage Valves & Underwater video/photography survey with technical reporting for M/V Good Hope through its laying a float at Dameitta Harbour on August 2012 , due to the request of MESSERS / LETH Egypt Agencies LTD Company .
14. IN-water video/photography survey with technical reporting for M/V Cleantec through its laying a float at El Dekhila Harbour on August 2012 , due to the request of MESSERS / Adani Shipping (China) Co.Ltd, these activities had executed under supervision , attendance of & with Certification of MESSERS / China Classification Society (CCS).
15. IN-water video/photography survey with technical reporting for M/V WILHELMINE ESSBERGER through its laying a float at Alexandria Harbor on July 2012 , due to the request of MESSERS / Gulf Agency Company (GAC) , these activities had executed under supervision , attendance of & with Certification of MESSERS / GERMANSCHIER Lloyds (GL).
16. All marine, survey & diving activities for provision & installing 10" HDPE Sea line for 500 meters route for influent water intake at plant of AMAL Petroleum Company (AMAPETCO) due to the request of PETROMAINT as main contractor on June-July 2012.
17. Underwater video/photography survey & technical reporting for Zafaranna GEMSA FPSO Tanker through its laying a float at ZAFARANNA – Red Sea on August 2012 , due to the request of MESSERS / THOME Co Ltd (Singapore) , these activities had executed under supervision , attendance of & with Certification of MESSERS / DET NORSKIE VERITAS (DNV).
18. Underwater Complete Sea Bed Survey , Sea Bed Preparation & all diving support activities for underwater laying / burial for International Fiber Optic Communication Cable due to the request Of MESSERS / Cable Trav Ocean– France , the client is ORASCOM Telecom / Alcatel-UK at West of Alexandria on March 2012.
19. Underwater activities & providing the professional technical reporting of the following operations to General Petroleum Company (GPC) due to the request of EMC as main contractor through January-February 2012 :
 - NDT Inspection of the annual survey for AMER-2 Platform
 - NDT Inspection of the annual survey for AMER-4 Platform

4. Through 2011:

21. Underwater activities & providing the professional technical reporting of the following operations to Petro Gulf Misr Company due to the request of PETROMAINT as main contractor through 2011 :
 - NDT Inspection of the annual survey for GEISUM Star (IMO#8750326) (ABS Certification)
 - NDT Inspection of the annual survey for WP-B Platform (IMO#9104572) (ABS Certification).
 - Debris Removal & Sea bed survey for the rig approaching area of TW-2 Platform
 - Debris Removal & Sea bed survey for the rig approaching area of WP.B Platform
 - Debris Removal & Sea bed survey for the rig approaching area of G-9 Well of Tawilla Platform.
22. Underwater video/photography survey with technical reporting for M/V Delphi Ranger through its laying a float nearby Suez Harbour on December 2011 , due to the request of MESSERS / LETH Egypt Agencies LTD Company , these activities had executed under supervision , attendance of & with Certification of Bureau VERITAS (BV).
23. Underwater video/photography survey & technical reporting for LPG/C BERGA II (IMO#9537032) through its laying a float at Alexandria Harbour on September 2011 , due to the request of MESSERS / UNIMAS Shipping Company , these activities had executed under supervision , attendance of & with Certification of MESSERS / LLOYDS Register Of Shipping (LR Class) .
24. Underwater Cleaning & video/photography survey with technical reporting for Floating Cranes Figge & Ganz through its laying a float at Alexandria Harbour on August 2011 , due to the request of MESSERS / The National River Port Management Company (Nile Cargo) , these activities had executed under supervision , attendance of & with Certification of MESSERS / Bureau VERITAS (BV).
25. Underwater Cleaning & video/photography survey with technical reporting for LPG MARIMAR GAS (IMO#7924035) through its laying a float at South of Suez Harbour on June 2011 , due to the request of MESSERS / UNIMAS Shipping Company, these activities had executed under supervision , attendance of & with Certification of MESSERS / GERMANISCHER Lloyds (GL).
26. Underwater video/photography survey with technical reporting for M/V Scotia Prince through its laying a float at Alexandria Harbour on March 2011 , due to the request of MESSERS / International Shipping Partners, Inc. , these activities had executed under supervision , attendance of & with Certification of Bureau VERITAS (BV).
27. Underwater video/photography survey & technical reporting for M/V ARMIA KRAJOWA through its laying a float at Dameitta Harbour on March 2011 , due to the request of MESSERS / Polish Steamship Company , these activities had executed under supervision , attendance of & with Certification of MESSERS / DET NORSKIE VERITAS (DNV).
28. Underwater video/photography survey with technical reporting for M/V TORM SKAGEN through its laying a float at DEIKHILA Harbor on January 2011 , due to the request of MESSERS / Yusen Navtec Co. Ltd .

5. Through 2010:

29. Underwater activities & providing the professional technical reporting of the following operations to Petro Gulf Misr Company due to the request of PETROMAINT as main contractor through January-October 2010 :
- Underwater Visual / video survey for Pipeline route between WP.A & WP.B Platforms
 - Underwater Visual / video survey for power cable route between WP.A & WP.C Platforms
 - Underwater Sea bed survey for 8" COFLEX Sealine at WP.A
 - Underwater Sea bed survey WP.A Platform.
 - NDT Inspection of the annual survey for Geisum Star (IMO#8750326) (ABS Certification)
 - NDT Inspection of the annual survey for WP-C Platform (LR Certification)
 - NDT Inspection of the annual survey for WP-D Platform (LR Certification)
 - NDT Inspection of the annual survey for WP-B Platform (IMO#9104572) (ABS Certification)
30. Underwater video/photography survey & technical reporting for M/V Alexandria (IMO#8810944) through its laying a float at Alexandria Harbour on November 2010 , due to the request of MESSERS / The Egyptian Navigation Company (ENC) , these activities had executed under supervision , attendance of & with Certification of MESSERS / LLOYDS Register Of Shipping (LR Class) .
31. All marine , survey & diving activities for provision & installing cathodic protection system repairs/protection works for water intake on suction sealines of firefighting station at South Bakr power plant of General Petroleum Company due to the request of PETROMAINT as main contractor on (September / October) 2010.
32. Underwater video/photography survey & technical reporting for M/V FALCON EYE3 (IMO# 8317540) & M/V FALCON EYE1 (IMO#7721407) through its laying a float at Alexandria Harbour on September/October 2010 , due to the request of MESSERS / Dubai Coast Shipping LLC (UAE) , these activities had executed under supervision , attendance of & with Certification of MESSERS / LLOYDS Register Of Shipping (LR Class) .
33. Underwater Complete Sea Bed Survey , Sea Bed Preparation & all diving support activities for underwater laying / burial for International Fiber Optic Communication Cable due to the request Of MESSERS / Cable Trav Ocean– France , the client is ORASCOM Telecom / Alcatel-UK at West of Alexandria on June / July 2010.
34. Underwater video/photography survey & technical reporting for ZAFARANNA GEMSA FPSO Tanker through its laying a float at ZAFARANNA – Red Sea on August 2010 , due to the request of MESSERS / AKER Solutions Co Ltd (Norway) , these activities had executed under supervision , attendance of & with Certification of MESSERS / DET NORSKIE VERITAS (DNV) .
35. Underwater video/photography survey & technical reporting for M/V Good Season through its lay a float at Suez Harbour on June 2010 , due to the request of MESSERS / PORT OF CALL Consulting cc as a consultant of the owner MESSERS / GOODEARTH MARITIME LIMITED Ltd, these activities had executed under supervision , attendance of & with Certification of MESSERS / Indian Register Of Shipping (IR Class) .
36. All marine , survey & diving activities for underwater recovery for OBC Seismic equipment due to the request Of MESSERS /Grant Geophysical –Australia on Gulf of Suez at Red Sea :
- At Abu Redis areas on January 2010.
 - At Ras Keniasa area of El Tur / Red Sea on April/May 2010.

6. Through 2009:

- 40.** Underwater activities & providing the professional technical reporting of the following operations to Petro Gulf Misr Company due to the request of PETROMAINT as main contractor through January-December 2009 :
- Visual / video survey for cables route between G-16 & WP.B Platforms
 - Sea bed survey for G-16 & G-19 with conductor inspection
 - Debris Removal Sea bed survey for the rig approaching area of TW-2 Platform
 - NDT Inspection of the annual survey for Rig / GEISUM Star (ABS Certification)
 - NDT Inspection of the annual survey for WP-C Platform (LR Certification)
 - NDT Inspection of the annual survey for WP-D Platform (LR Certification)
 - Debris removal & Sea bed survey for the rig approaching area of TAWILLA Platform
 - Debris removal & Sea bed survey for the rig approaching area of WP.B Platform
- 41.** Underwater cleaning, splash zone coating application, underwater video Inspection & underwater still photographing for NAV Platform of West Petroleum Company (WEPCO) due to the request of PETROMAINT as main contractor on 2009.
- 42.** Underwater Complete Sea Bed Survey , Sea Bed Preparation & all diving support activities for underwater laying / burial for International FiberOptic Communication Cable due to the request Of MESSERS / Cable TravOcean– France , the client is Egypt Telecom / Alcatel-UK at South of Suez on December 2009.
- 43.** Underwater Complete Sea Bed Survey , Sea Bed Preparation & all diving support activities for underwater laying / burial for International FiberOptic Communication Cable due to the request Of MESSERS / Cable TravOcean– France , the client is ORASCOM Telecom / Alcatel-UK at West of Alexandria on November 2009.
- 44.** Underwater video/photography survey & technical reporting for M/V Maysoraah through its laying a float at Alexandria Harbor on June 2009 , due to the request of MESSERS / AL FASSEL Company (Saudia Arabia), these activities had executed under supervision , attendance of & with Certification of MESSERS / Bureau VERITAS (BV).
- 45.** Underwater cleaning, underwater Video Survey & Technical reporting due to the request of MESSERS Egyptian Navigation Company & under supervision , attendance of & with Certification of MESSERS Lloyds Register (LR) for the next marine vessels :
- M/V Al Minufiyah at Alexandria harbor on April 2009
 - M/V Abu Egila at Alexandria harbor on April 2009
 - M/V Ibn Al Waleed at Alexandria harbor on June 2009
- 46.** Underwater cleaning / video/photography survey & technical reporting for M/V VemaOcean through its laying a float at Suez Harbour on March 2009 , due to the request of MESSERS / BELMARES Shipping Company .
- 47.** Underwater video/photography survey & technical reporting for M/V Melody through its laying a float at Alexandria Harbour on February 2009 , due to the request of MESSERS / Inchape Shipping Services Company .

7. Through 2008:

- 50.** Underwater activities & providing the professional technical reporting of the following operations to Petro Gulf Misr Company due to the request of PETROMAINT as main contractor through January-December 2008 :
- Underwater Installation for skid anodes with Cathodic Potential Survey at WPA Platform
 - Sea bed survey for the rig approaching area of TW-2 well of Tawilla Platform
 - NDT Inspection of the annual survey for Rig / Geisum Star (ABS Certification)
 - NDT Inspection of the annual survey for WP-B Platform (ABS Certification)
 - Diving Support activities for Rig Move Operations to WP.A & WP.D Platforms
 - NDT Inspection of the annual survey for WP-D Platform (LR Certification)
 - Debris removal & sea bed survey for the rig approaching area of WP-A Platform
 - Debris removal & sea bed survey for the rig approaching area of WP-D Platform
 - Sea bed survey for the rig approaching area of G-10 well of Tawilla Platform
 - Underwater survey for the laid power cable between G-16 & WP-B Platform
- 51.** All marine , survey & diving activities for underwater recovery for OBC Seismic equipment due to the request Of MESSERS /Grant Geophysical –Australia on Gulf of Suez at Red Sea :
- At El Tur & GEMSA areas on (February-April) 2008.
 - At GEMSA area on November 2008.
- 52.** All marine , survey & diving activities for provision & installing cathodic protection system for water intake on suction sealines of firefighting station at South Bakr power plant of General Petroleum Company due to the request of PETROMAINT as main contractor on (March – June) 2008.
- 53.** Sea bed survey for NT-2 exploration well at Geisum field of PetroGulf Misr Company due to the request of Misr Marine For Surveys & Services as main contractor through March 2008
- 54.** Underwater cleaning , fenders' installation , underwater video inspection & underwater still photographing for GEMSA Platform of GEMSA Petroleum Company (GEMPETCO) due to the request of PETROMAINT as main contractor on March 2008 .
- 55.** Underwater video/photography survey & technical reporting for M/V Munin through its laying a float at Alexandria Harbour on March 2008 , due to the request of MESSERS / Bernhard Schulte Ship management Company (CYPRUS), these activities had executed under supervision , attendance of & with Certification of MESSERS / Lloyds Register of Shipping (LR).
- 56.** Underwater cleaning , underwater Video Survey & Technical reporting due to the request of MESSERS Egyptian Navigation Company & under supervision , attendance of & with Certification of MESSERS Germanischer Llyod (GL) for the next marine vessels :
- M/V Al Hussein at Alexandria harbor on January 2008
 - M/V Marsa Allam at Dameitta harbor on March 2008
- 57.** Underwater Video Survey, Ultrasonic Thickness Measurements & Technical reporting for Two Nile Cruises at Luxor & Aswan due to the request of different touristic Companies.

8. Through 2007:

- 58.** Underwater activities & providing the professional technical reporting of the following operations to PetroGulf Misr Company due to the request of PETROMAINT as main contractor through (November-December) 2007 :
- Installation of new anodes & application of Splash Zone Coating prior NDT measurements of the annual survey for WP-B Platform (ABS Certification)
 - NDT Inspection of the annual survey for WP-C Platform (LR Certification)
 - NDT Inspection of the annual survey for WP-D Platform (LR Certification)
 - Splash zone coating on legs of WP-A Platform
 - Debris removal & sea bed survey for the rig approaching area of TW-6 Tawilla Platform
 - Rig move diving support activities for TW-6 Tawilla Platform
- 59.** Underwater Inspection for the Flexible Riser Lazy-S System at Warda Field of GEMSA Petroleum Company (GEMPETCO) due to the request of PETROMAINT as main contractor on June 2007. (This project included many underwater activities ; Ultrasonic thickness Measurements , Cathodic Potential Measurements , tether rigging inspection , underwater visual & video inspection Using CCTV for the whole structure & Professional Technical Reporting) .
- 60.** Underwater video/photography survey & technical reporting for M/V Red Sea II through its laying a float at Safaga Harbour on June 2007 , due to the request of MESSERS /Waves shipping S.A. “ through “ Perla Line Maritime Corporation-Greece “, these activities had executed under supervision , attendance of & with Certification of MESSERS / Bureau VERITAS (BV) .
- 61.** Underwater Survey & Cathodic Potential Measurements for three Sealines (10" crude oil , 14" gas & 24" shipping sea lines) of East Zeit Petroleum Company (ZEITCO) on June 2007 . (This project included many underwater activities ; Cathodic Potential Measurements , underwater visual , video inspection Using CCTV for the all pipelines & Professional Technical Reporting) .
- 62.** All marine , survey & diving activities for underwater recovery for OBC Seismic equipment due to the request Of MESSERS /Grant Geophysical –Australia at Ras Dib area of Red Sea on May & June 2007.
- 63.** Complete Underwater Survey & NDT for GEMSA Platform of GEMSA Petroleum Company (GEMPETCO) due to the request of PETROMAINT as main contractor on April 2007. (This project included many underwater activities ; Ultrasonic thickness Measurements , Cathodic Potential Measurements , Magnetic Particles Inspection For welds , splash zone coating inspection , underwater visual / video inspection Using CCTV for the whole structure & Professional Technical Reporting) .
- 64.** Underwater Survey & NDT for upper ray of ZEITCO Platform of East Zeit Petroleum Company (ZEITCO) due to the request of Misr Marine Surveys & Services Company as main contractor due to a boat hit to the platform on April 2007 . (This project included many underwater activities ; Ultrasonic thickness Measurements , Magnetic Particles Inspection For welds , underwater visual & video inspection Using CCTV for the whole structure , Professional Technical Reporting) .
- 65.** All marine , survey & diving activities for underwater recovery for OBC Seismic equipment due to the request Of MESSERS / Grant Geophysical – Australia at Idko area on April 2007.
- 66.** Underwater cleaning , underwater Video Survey & Technical reporting due to the request of MESSERS Egyptian Navigation Company & under supervision , attendance of & with Certification of MESSERS Germanischer Lloyd (GL) for the next marine vessels :
- M/V Taba at Dameitta harbor on November 2007

ESG is ISO 9001-2008 Certified Company through

9. Through 2006:

- 70.** Underwater cleaning , underwater video survey & technical reporting for Floating Barge FARASAN 1 through its laying a float at Dekhila Harbour on October 2006 , due to the request of MESSERS / Archirodon Construction Overseas Co.S.A., these activities had executed under supervision , attendance of & with Certification of MESSERS / Bureau VERITAS (BV).
- 71.** Underwater welding repairs , underwater video/photography survey & technical reporting for M/V Cape Brazil through its laying a float at south of Suez Harbour on period 20:26th September 2006 , due to the request of MESSERS / Brave Maritime Corporation-Greece , these activities had executed under supervision , attendance of & with Certification of MESSERS / Bureau VERITAS (BV).
- 72.** Underwater Video Survey & Technical reporting for M/V Castillo De San Juan at Dekhila Harbour on July 2006 due to the request of MESSERS International Navigation & Petroleum Services Company , these activities had executed under supervision , attendance of & with Certification of MESSERS Llyods Register Of Shipping (LR) .
- 73.** Underwater Complete Sea Bed Survey , Sea Bed Preparation & all diving support activities for underwater burial for International Communication Cable FALCON due to the request Of MESSERS / (Cable & Engineering Limited – UK , the client is Egypt Telecom / Alcatel-UK at South of Suez on June 2006.
- 74.** Underwater Complete Sea Bed Survey , Sea Bed Preparation & all diving support activities for underwater burial for International Communication Cable SEMEWE 4 due to the request Of MESSERS / (OCEANTEAM2000 – KRAKEN Marine Solutions) Joint Venture from UK , the client is Egypt Telecom / Alcatel-UK at South of Suez on March 2006.
- 75.** Underwater cleaning , underwater Video Survey & Technical reporting due to the request of MESSERS Egyptian Navigation Company & under supervision , attendance of & with Certification of MESSERS Llyods Register Of Shipping (LR) for the next marine vessels :
- M/V Ikhnaton at Alexandria Harbour on March 2006
 - M/V Al Minufiyah at Alexandria harbour on March 2006
- 76.** Marine Growth Removal & Underwater Complete Survey for AMAL (A) Platform of Amal Petroleum Company (AMAPETCO) due to the request of PETROMAINT as main contractor , under supervision & attendance of MESSERS / Bureau VERITAS (BV) as an international classification Society on February 2006.
- 77.** Underwater Video Survey , Ultrasonic Thickness Measurements & Technical reporting for five Nile Cruises at Luxor & Aswan due to the request of different touristic Companies .
